- SEO.

EMPLOYMENT HISTORY

Portent, Inc.

1/4/2006 — Present

Front End Web Developer and Web Designer

At Portent I was responsible for front-end development for clients such as Lucky Brand Jeans, HP Cloud, Amazon Services, momAgenda, Autoweek, the IAMAW, AEG Tour of California, Full Circle Farms, and more. Over the years I have made many WordPress themes, some from scratch and some based on other themes. My preferred method of creating WordPress themes is starting with WP bootstrap and customizing from there. I am also highly skilled at creating custom HTML email templates and landing page templates for various applications.

In addition to my front-end development job, I also manage the schedule for our small creative team, doling out tasks and making sure things get done on time.

<http://www.hpcloud.com/>

I did all of the HTML and front-end work for this responsive Drupal website. This was one of my first responsive websites that I created from scratch. Nowadays I usually use Bootstrap as starting point for my responsive themes.

<http://accedent.com/>

Acceledent is a fully responsive WordPress theme that I created, using a responsive theme as a starting point. I did all of the HTML, CSS and Javascript for this website, as well as importing and styling content.

<http://info.portent.com/freeraingage>

I created this responsive HubSpot landing page template for Portent.

<http://resources.moxiesoft.com/ppc-sales-chat-demo-test.html>

I created this responsive Marketo landing Page template for Moxie.
